

# .NET Conf 2020 Syndication

November 10, 8:00am PT – 5:00pm PT

November 11, 9:00am PT – November 12, 5:00pm PT

Live Stream Embed Instructions for webmasters

.NET Conf 2020 will broadcast the entire conference on [www.dotnetconf.net](http://www.dotnetconf.net) using the Microsoft Learn TV player. You can syndicate the broadcast on your own developer-focused sites. Please contact [dotnetconf@dotnetfoundation.org](mailto:dotnetconf@dotnetfoundation.org) and let us know!

This document contains embed information for the Learn TV live streaming player. Sites can easily embed the webcast by inserting the iframe code snippet below. The provided player currently runs developer-focused shows 24/7 and will switch to .NET Conf broadcast slate 15 minutes before the keynote starts at 8:00am PT on November 10th.

## How to and best practices:

- To stream the event live, place the iframe code snippet provided below onto your site where you would like the player to appear. The feed will be broadcast in 1020p30 format and provide the option for end users to enable English captions.
- Please test the embedded code in advance of the live stream.
- You are welcome to keep your .NET Conf site's logos and branding around the iframe experience, and the player can be scaled appropriately for your site using CSS or the width and height tags within the iframe code snippet to integrate with your responsive site design. **Important Note:** 640x360 is a typical for in-page viewing, but if you chose to change the size of the player, it's important that you keep a 16x9 aspect ratio!
- Please contact [dotnetconf@dotnetfoundation.org](mailto:dotnetconf@dotnetfoundation.org) with any questions.

---

Please use the code below for implementation:

```
<iframe id="videoPlayer" width="640" height="360"
        border="0" frameborder="0" scrolling="no"
        src="https://mediastream.microsoft.com/events/2020/MSLearn/player/MSLearn.html"
        allowfullscreen style="overflow: hidden;">
</iframe>
```
